## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to a method of delivering content to an audience member over a plurality of digital mediums based on an audience member profile, comprising providing access to first and second digital mediums, providing a common audience member profile to the mediums, associating audience member and delivering content to the audience member via the mediums, classified in class 709, subclass 224.
  - II. Claims 8-23, drawn to a method of delivering content to an audience member based on an audience member profile, comprising receiving a request for a website, storing a cookie associated with the website, identifying a unique identifier, storing and associating audience member with profile data and a segment of audience members, and delivering content to the audience member, classified in class 709, subclass 219.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as providing access to first and second digital mediums and providing a common audience member profile to the mediums, which does not involve receiving a request for a website, storing a cookie associated with the website, and identifying a unique

identifier. See MPEP § 806.05(d)

3. Since the restriction is complex and examiner knows from past experience that an election will not be made by telephone, this restriction is proper under MPEP 812.01.
